

# Keelio Software Price Sheet

The following is the current price sheet for all Keelio Software products. For the most up to date pricing please visit <http://www.keelio.com>

Product	Number of Licenses	Price
Dynamics GP SSIS Toolkit	1	\$849.95
XML SSIS Toolkit	1	\$299.95
Maintenance Plan	1 Year	Fixed Price Maintenance Renewals. See website for prices.

For information on what is included in each product listed above, please review the product brochures for each of the listed products you intend to purchase which are available at [www.keelio.com](http://www.keelio.com).

One year of maintenance is included in every purchase. After the maintenance term expires you will no longer have access to install the latest version of the software components and will be locked into the last version of the component that was released within your previous maintenance period. This means that updates to the program after your maintenance plan has expired will not be able to be activated until the maintenance plan is renewed.

Yearly maintenance plans are fixed price and can be purchased from the Store on [www.keelio.com](http://www.keelio.com). If you have two licenses of the XML SSIS Toolkit for example you would purchase two one year renewals to reinstate your maintenance for the following year. Maintenance renewals that are made after your maintenance period has expired will not extend your subscription from that date, it will extend your subscription from the previous expiration date. For instance, if you waited 2 months after your maintenance plan has expired to renew and your expiration was 3/1/2009 your new expiration date will be 3/1/2010 not 5/1/2010.

A maintenance plan renewal e-mail will be mailed 30 days prior to expiration of the maintenance plan to the account the software products were purchased under.

One license is required for each SQL Server Integration Services Server. Development and Test Servers do not require an additional license. Clustered servers require a license for each node of the cluster regardless of whether or not it is active or not.
